INTRODUCTION

As a developer with a strong background in HTML, CSS, and JavaScript, I have a track record of success in building modern and responsive websites and web applications.

I have a particular expertise in using React, Strapi CMS and Node.js, and have used these technologies to deliver high-performance projects for a variety of clients.

Additionally, I have experience with Express.js and database design, and am proficient in using tools such as TailwindCSS and SASS to streamline my workflow and improve the efficiency of my projects. Whether working independently or as part of a team, I am a reliable and proactive developer with a keen eye for detail and a commitment to delivering top-quality work.

EXPERIENCES

Awat's Autoservice – 2023

Freelance

Designed and developed a fully functional WordPress website for Awat's Autoservice, leveraging WooCommerce for e-commerce functionalities. The website is hosted on Bluehost, ensuring reliable performance and scalability. Utilized a customizable WordPress template and tailored it to meet the specific requirements and branding of the client. Integrated various plugins and customizations to enhance user experience and streamline online transactions. Delivered a polished and user-friendly website within the specified timeline, contributing to increased online visibility and business growth for the client.

- Customization and integration of WordPress template
- Implementation of WooCommerce for e-commerce functionalities
- Hosting setup and management on Bluehost
- Integration of plugins and customizations
- Tailoring website design to match client's branding
- Collaboration with client to ensure requirements were met

My Look My Way - Shopify Store Administrator and Developer, *Current* Freelance

Responsible for the redevelopment and ongoing administration of mylookmyway.com, a Shopify-based e-commerce platform specializing in fashion products. Lead efforts in updating the theme and implementing new features to enhance user experience and drive sales. Collaborate closely with the business owner to understand business needs and translate them into technical requirements. Regularly perform updates, maintenance, and troubleshooting to ensure smooth operation of the website. Continuously monitor performance metrics and implement optimizations to improve conversion rates and customer satisfaction.

- Redesigned and updated Shopify theme to reflect current trends and branding guidelines
- Implemented new features such as personalized product recommendations, dynamic pricing, and enhanced search functionality
- Conducted A/B testing and analyzed user behavior to inform design and functionality decisions
- Managed product catalog, including uploading new products, updating descriptions, and optimizing images for SEO
- Provided ongoing support and training to staff on Shopify administration and best practices
- Collaborated with marketing team to implement promotional campaigns and optimize landing pages for conversions

Orca Decorating and Fine Finishing – 2023

Freelance

I am proud to present the website that Abayomi and I in collaborating built for a small decorating and fine finishing company. Using my expertise in React.js, TailwindCSS, Flowbite, and other cutting-edge libraries like Herolcon and Tailwind-UI, I have successfully converted the Figma design into a stunning and

fully responsive front-end. I am confident that this website will deliver a beautiful and user-friendly experience to visitors.

ChoizPlace.com - React.js Developer and Strapi CMS Administrator,

Current

Freelance

Lead developer and administrator for ChoizPlace.com, a dynamic blog website built with React.js and powered by Strapi CMS. Responsible for the end-to-end development and management of the website, from initial design and implementation to ongoing maintenance and updates. Leveraged React.js to create a responsive and interactive user interface, providing an engaging browsing experience for visitors. Implemented Strapi CMS to facilitate content management, enabling easy creation, editing, and publication of blog posts and articles. Hosted the website on Railway, ensuring reliable performance and scalability. Collaborated with content creators and stakeholders to ensure alignment with brand identity and content strategy.

- Developed a custom blog website using React.js, incorporating modern design principles and best practices
- Integrated Strapi CMS to streamline content management workflows and empower content creators to publish new articles and updates autonomously
- Implemented features such as article search, category filtering to enhance user engagement and accessibility
- Optimized website performance and loading times through efficient code structure and asset optimization
- Implemented SEO best practices to improve search engine visibility and drive organic traffic to the website
- Conducted regular maintenance and updates to ensure compatibility with new technologies and security patches
- Provided training and support to content creators on using the CMS and optimizing content for maximum impact

Calendar – 2022
